

Assignment 4: Using Matlab Simulink to plot the following signal in time and frequency domains

$$f(t) = \sum_{k=1}^5 \frac{1}{k} \sin(100k\pi t)$$

Note the following;

- Prepare your file in **.slx** format and submit it before the due date.
- The maximum number of students per assignment is one.
- Name your **.slx** as **FirstName_MiddleName_LastName**.
- Sharing Matlab scripts among other groups is not allowed.
