

Signal Processing Using MATLAB- Assignment -2-

Assignment: Implement the MATLAB code as in following script file, should be named MATLAB file as (HW2.m), Make sure to follow the following requirements:

Note: Re-write the MATLAB scripts based on our course rules, make cells, cell title, and in line descripts and units as discussed in our lecture.

Part A: Generate a MATLAB code to perform part B of the previous assignment using only codes, an fft MATLAB function will be needed to perform it.
(50 points)

The output will be as the following

Part B: Use MATLAB Simulink to perform part A (50 points):

The output will be as the following for time and frequency domain
