

Signal Processing Using MATLAB- Assignment -3-

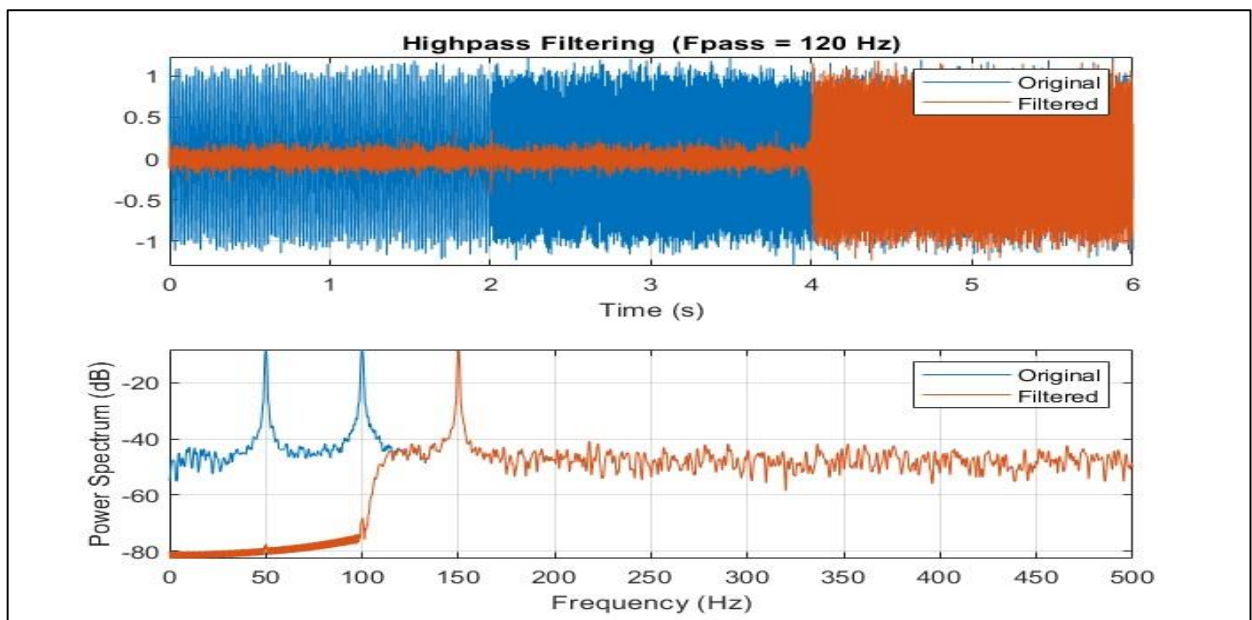

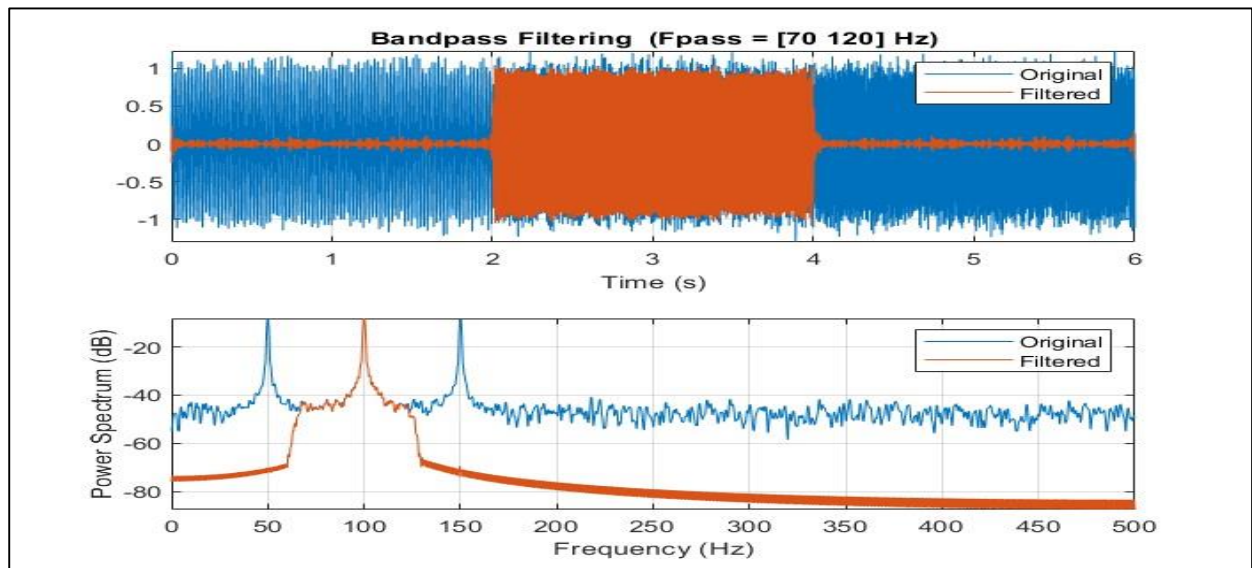

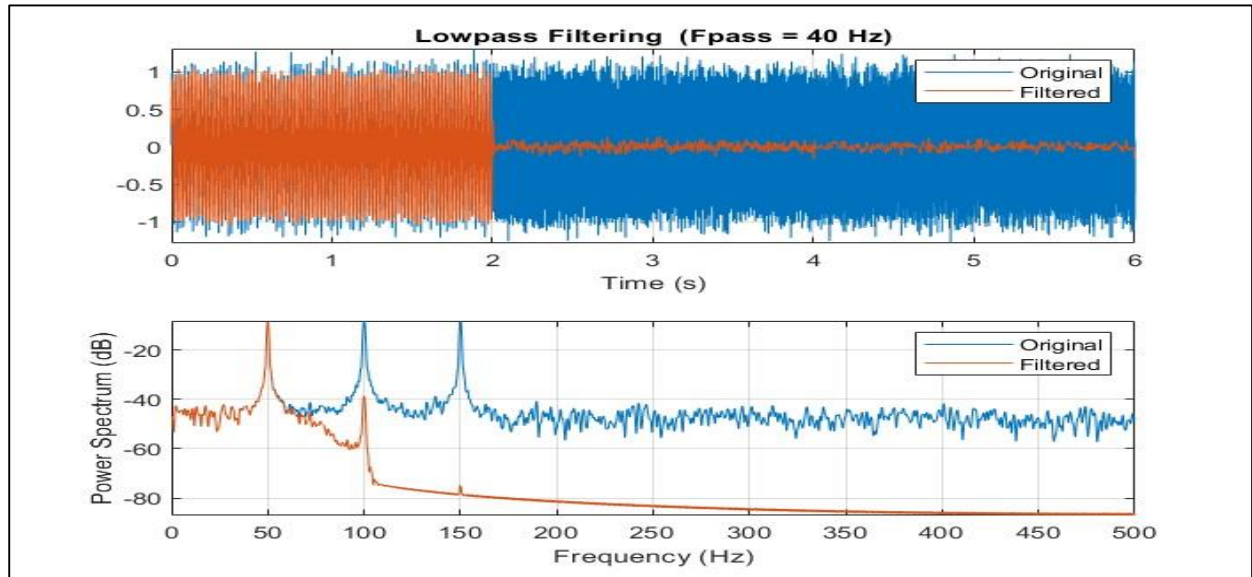

Assignment: Implement the MATLAB code as in following script file, should be named MATLAB file as (HW3.m), Make sure to follow the following requirements:

Note: Re-write the MATLAB scripts based on our course rules, make cells, cell title, and in line descripts and units as discussed in our lecture.

Part A: Generate a MATLAB code to generate the following original and noisy signals with frequencies (50,100,150) Hz as the following figures. **(20 points)**

Part B: Use MATLAB Codes to add filters (low-pass, band-pass, high-pass) to the noisy signal. The output will be as the following figures. **(40 points)**

Part C: Use MATLAB Simulink to perform part B. The output will be as the following figures. **(40 points)**
