

Chapter 17, Problem 31P

Problem

Let a_n and b_n be the Fourier series coefficients of $f(t)$ and let ω_0 be its fundamental frequency. Suppose $f(t)$ is time-scaled to give $h(t) = f(at)$. Express the a'_n , b'_n and, ω'_0 and, of $h(t)$ in terms of a_n , b_n , and ω_0 of $f(t)$.

Step-by-step solution

Step 1 of 1
