

Problem

The Fourier transform of e^{j2t} is:

(a) $\frac{1}{2 + j\omega}$

(b) $\frac{1}{-2 + j\omega}$

(c) $2\pi\delta(\omega - 2)$

(d) $2\pi\delta(\omega + 2)$

Step-by-step solution

Step 1 of 1

$$F[e^{j\omega_o t}] = 2\pi\delta(\omega - \omega_o)$$

so $F[e^{j2t}] = 2\pi\delta(\omega - 2)$
